Theo Lindqvist

Frontend Engineer

Seattle, WA | theo.lindqvist@example.com | (555) 010-0142

Professional Summary

Frontend engineer who builds fast, accessible interfaces in React and TypeScript. Five years in product teams, with a focus on performance and design systems. Comfortable pairing with designers and backend engineers and writing the tests that keep refactors safe.

Technical Skills

Languages: TypeScript, JavaScript (ES2022), HTML5, CSS3, GraphQL
Frameworks: React, Next.js, Redux Toolkit, React Query, Tailwind CSS, Styled Components
Testing: Jest, React Testing Library, Cypress, Storybook, axe-core
Tooling: Vite, Webpack, ESLint, GitHub Actions, Figma, Lighthouse

Work History

Senior Frontend Engineer, *Pinecrest Commerce* **Jan 2022 - Present**

- Led migration of a 400-page storefront from client-side React to Next.js server rendering, improving Largest Contentful Paint from 4.1 s to 1.9 s.
- Built a design system of 45 accessible components in Storybook, adopted by 6 product teams.
- Brought the checkout flow to WCAG 2.1 AA, fixing keyboard traps and screen reader labels found with axe-core and manual NVDA testing.
- Replaced ad hoc fetch calls with React Query and a typed GraphQL client, removing a class of stale-data bugs.
- Reduced JavaScript shipped on the product page by 52% with route-level code splitting, image optimization and removing two heavy libraries.
- Implemented a real-time inventory badge with WebSockets and optimistic UI updates that handles 1,500 concurrent users.
- Created a visual regression pipeline with Storybook and Chromatic that catches unintended style changes in pull requests.

Frontend Developer, *Orbit Studio* **Aug 2019 - Dec 2021**

- Shipped 20+ marketing and dashboard pages in React with Redux, serving 2M monthly visitors.
- Added Cypress end-to-end tests that caught 30 regressions before release.
- Cut bundle size by 38% with code splitting and removing unused dependencies.
- Built an internal analytics dashboard with React, Recharts and D3 used daily by 40 account managers.

Projects

Open-source: a11y-checklist *(React, TypeScript)*

- Maintainer of an accessibility review checklist app with 900 GitHub stars.

Pixel Budget *(Next.js, TypeScript, Tailwind CSS)*

- Web performance budget tracker that fails a CI build when Core Web Vitals regress; used by 3 open-source projects.

Education

B.A. Interaction Design, Northgate University (2019)
