Frontend: React, JavaScript, TypeScript, Tailwind CSS
Infrastructure: Docker, AWS (ECS, RDS, S3, CloudFront), Terraform, GitHub Actions
Practices: Test-driven development, code review, agile, REST API design

EXPERIENCE

Software Engineer (employee #4), ***Tidewater Health Tech*** **Feb 2022 - Present**

- Built the patient scheduling product from scratch in Django and React; grew to 60 clinics and 25,000 monthly users.
- Designed a Celery task pipeline that sends 100k appointment reminders per day with automatic retries.
- Cut AWS spend by 31% by right-sizing ECS tasks and moving static assets to CloudFront.
- Set up CI/CD with GitHub Actions: tests, linting and zero-downtime deploys in 9 minutes.
- Added role-based access control and audit logging in Django to meet HIPAA requirements for patient data.
- Built a React admin console with TypeScript and React Query that cut support requests by 35%.
- Profiled slow Django ORM queries with django-debug-toolbar and added indexes and select_related calls, lowering p95 API latency from 900 ms to 210 ms.

Junior Developer, ***Copperfield Digital Agency*** **Jun 2020 - Jan 2022**

- Delivered 12 client websites and web apps using Django and jQuery, then React.
- Wrote integration tests with pytest that cut production bugs by 25%.
- Integrated Stripe subscriptions and webhooks for a client SaaS product processing $90k a month.

PROJECTS

Budget Buddy ***(FastAPI, React, PostgreSQL)***
