Elena Petrova

Site Reliability Engineer

Denver, CO | elena.petrova@example.com | (555) 010-0147

Professional Summary

Site reliability engineer who automates infrastructure and measures reliability with SLOs. Experience running Kubernetes clusters at scale on AWS and GCP. Believes in small changes, good runbooks and learning from every incident.

Technical Skills

Languages: Go, Python, Bash, YAML
Infrastructure: Kubernetes, Helm, Terraform, AWS (EKS, EC2, VPC, IAM), GCP (GKE)
Delivery: GitHub Actions, ArgoCD, Jenkins, GitOps
Observability: Prometheus, Grafana, Loki, OpenTelemetry, PagerDuty
Practices: SLOs and error budgets, incident response, capacity planning, chaos testing

Work History

Senior SRE, *Cobalt Cloud Services* **Feb 2021 - Present**

- Run 12 production Kubernetes clusters on EKS serving 3,000 requests per second with 99.95% availability.
- Defined SLOs for 25 services and built Grafana dashboards and burn-rate alerts; paging noise fell by 55%.
- Wrote Terraform modules for VPCs, clusters and IAM, reducing new environment setup from 3 days to 40 minutes.
- Introduced ArgoCD GitOps deployments and automated rollbacks, cutting failed releases by 70%.
- Led 20+ incident reviews and wrote blameless postmortems.
- Reduced Kubernetes compute cost by 33% with right-sized requests, spot node pools and the cluster autoscaler.
- Built a self-service CI template in GitHub Actions used by 60 repositories, with security scans, image signing and SBOM generation.
- Ran quarterly game days and chaos experiments with Litmus, finding 9 hidden single points of failure.

Systems Engineer, *Redwood Hosting* **Jan 2018 - Jan 2021**

- Automated server provisioning with Ansible for 400 Linux hosts.
- Wrote a Go tool that detects and drains unhealthy nodes, saving the on-call team about 6 hours a week.
- Migrated monitoring from Nagios to Prometheus and Grafana for 400 hosts.

Projects

Open-source: k8s-drain-helper *(Go, Kubernetes client-go)*

- Operator that safely drains nodes during upgrades while respecting pod disruption budgets.

Education

B.S. Computer Science, Highland State University (2017)

Certifications and Tools

- Certified Kubernetes Administrator (CKA)
- HashiCorp Certified: Terraform Associate
