Fatima Al-Sayed

Cybersecurity Analyst

Arlington, VA | fatima.alsayed@example.com | (555) 010-0149

SUMMARY

Security operations analyst with 4 years in a 24x7 SOC. Experienced in alert triage, incident response and vulnerability management. Wants to grow into detection engineering and threat hunting.

TECHNICAL SKILLS

Security tools: Splunk, CrowdStrike Falcon, Palo Alto, Nessus, Wireshark, Burp Suite, Microsoft Defender
Frameworks: MITRE ATT&CK, NIST CSF, NIST 800-53, CIS Controls, OWASP Top 10
Skills: Incident response, threat hunting, phishing analysis, log analysis, vulnerability management, EDR, SIEM tuning
Scripting: Python, PowerShell, Bash, regular expressions

EXPERIENCE

Security Operations Analyst II, *Sentinel Managed Security* **May 2022 - Present**

- Triage about 150 Splunk and CrowdStrike alerts per shift and escalate confirmed incidents with a complete timeline.
- Cut false positives by 38% by tuning 40 correlation searches against MITRE ATT&CK techniques.
- Led response to 12 business email compromise incidents, containing each in under 2 hours.
- Wrote Python scripts that enrich IP and hash indicators automatically, saving the team about 10 hours per week.
- Run weekly Nessus scans and track remediation of critical vulnerabilities to 95% closure within SLA.
- Built a phishing triage playbook in Splunk SOAR that closes 70% of reported emails automatically with analyst review.
- Ran tabletop exercises for ransomware scenarios with IT and legal leaders and updated the incident response plan.
- Hunted for persistence mechanisms using Sysmon logs and PowerShell, finding 2 misconfigured service accounts.

IT Security Intern, *Cardinal County Government* **Jun 2021 - Apr 2022**

- Reviewed firewall logs and reported suspicious traffic.
- Helped run a phishing awareness campaign for 800 employees; click rate fell from 21% to 8%.
- Monitored endpoint alerts in Microsoft Defender and documented a repeatable triage checklist.

PROJECTS

Home SOC Lab *(Splunk, Security Onion, Windows AD)*

- Built a lab to practice detection of lateral movement and Kerberoasting; wrote 15 detection rules.

Capture the Flag team *(Web, forensics, reverse engineering)*

- Placed 14th of 600 teams in a national university CTF; wrote up web exploitation challenges.

EDUCATION

B.S. Cybersecurity, Potomac University (2021)

CERTIFICATIONS

- CompTIA Security+
- CompTIA CySA+
- GIAC Security Essentials (GSEC)
